

## White Vinegar

Vinegar works as a milder disinfectant. Besides, it's better than bleach for cleaning mineral stains and soap scum.

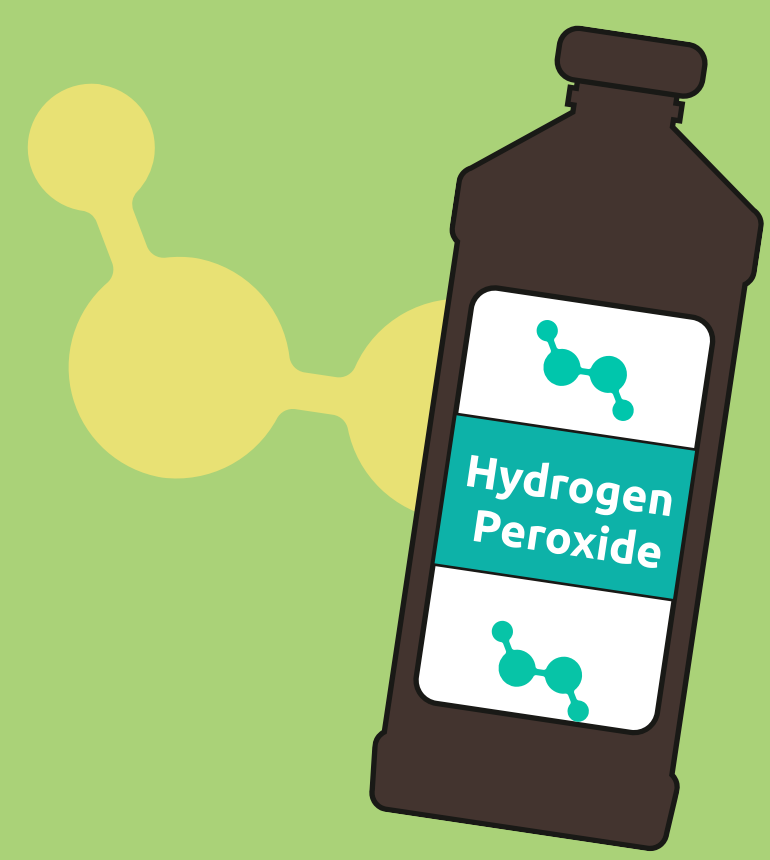

## Baking Soda

This kitchen staple is also a whitening agent. Use it instead of bleach on your laundry and for stain removal.

## Hydrogen Peroxide

Hydrogen peroxide can help you brighten and disinfect almost any surface (without dangerous chlorine fumes!)

## Lemon Juice

Citric acid is great for removing stains and foul smells. Ditch the bleach and pour lemon juice into your laundry!

## Castile Soap

A concentrated, vegetable-based soap. It's a natural alternative to bleach and almost any other cleaning product.
